

UNIVERSAL

absolute Universal is the most advanced printer of the absolute range. With its printing capabilities

- fix and variable texts,
- batch #
- date / time,
- use by / best before / expiry date,
- counter,
- shift code,
- logos,
- all the most usual 1D barcodes and 2D barcode

absolute Universal provides full flexibility in message design for each type of marking need.

BCD (external message selection), RS-232 and Ethernet allows interfacing with your system for a perfect integration and elimination of human error.

Adding 3 optional heads to the 4 standard groups provides this printer the capability to drive 1 head each of 4 independent production lines effectively replacing 4 stand-alone units.

absolute Universal benefits from all the key benefits brought by the absolute concept:

- printing on non-porous substrates (coated carton, plastics...),
- high resolution printing,
- flexibility in message design and in the printer set up,
- no maintenance,
- capability of using multi-substrate fast dry ink and water based ink simultaneously on the same printer.

absolute Universal for unlimited coding & marking on porous & non-porous materials
