

## Folder belts

**Stand number: 810**

The DG-E 10/30 and DG-E 10/40 transmission belts are the thermoplastic alternative to traditional Chiorino polyamide belts of the DG series for folder gluers in the cardboard industry. They are also suitable for power transmission as live roller drives in other industrial fields and are used on cardboard box-folding machines.

Thermoplastic folder belts with traction core in polyester and elastic covering can be fitted on site using the Fast Joint system and equipment, which require only a few minutes and no adhesives.

## Thermal inkjet ink range

**Stand number: 749**

APS has expanded its ink range for non-porous date coding applications which are suitable for confectionary manufacturers, ice-cream and snack food industries.

The expanded ink supply for the Apsolute thermal inkjet (TIJ) printer is suitable for non-porous materials such as BOPP and other film materials, varnished cartons and plastics; all porous surfaces can also be coded with the large range of inks available.

The ink range has expanded from traditional black to include a range of colours that can provide quicker drying time with good adhesion. The colour palette includes both alcohol and water-based inks.

In industrial environments, inks must possess short drying times under high production rates, strong adhesion to porous and non-porous surfaces, and high contrast and sharpness. All these issues are addressed with the range of thermal inkjet inks.

All the inks are developed and tested in APS's German headquarters often to individual specifications.

Heat Seal Solutions

**designers and manufacturers of tray sealing machinery**

Proseal manufacture an extensive range of manual, semi-automatic and fully-automatic heat-sealing machines for the food industry. Offering throughputs from 15 to 180 packs per minute, all machines in our range are capable of modified atmosphere packaging. **Please contact us for further details.**

**GTO**  
upto 45 packs per minute

**GTR**  
upto 30 packs per minute

**SP30**  
upto 30 board sandwich packs per minute

**AP60**  
upto 160 packs per minute

**GT1**  
upto 60 packs per minute

**SP60**  
upto 90 board sandwich packs per minute

**GT2**  
upto 90 packs per minute

**OC**  
fill line upto 60 packs per minute
